

Sasha Lukas

Software Engineer

Inspired back-end developer with broad experience in Javascript/ES6, React framework. 1.4 years experience with Python using Django.

PROJECTS

Sugar Snaps — Django Web App

Project for Columbia City Community. Social share application with Django, CSS, and Bootstrap4. Designer, Creator, Researcher, ScrumMaster. Features I implemented were the entire models. Resolved issues for following, signout, and css styles. Enjoyed designing and testing features. Other features are the following: user profile, user rating, forum, delete user and posts.

Twitter Clone — React Web App

React web application, nodes, css, bootstrap. Scrum Master. Writing and testing code for efficiency. Allocating tasks from a scrum table and upkeep the progress. Implemented components state, how to fetch data from an external API and how to store and display it.

EXPERIENCE

UIE Coach — Kenzie Academy

April 2020 - August 2020 // Indianapolis, Indiana

Helping students understand the concepts of react, redux, asynchronous, and api's. Test student submissions and follow up with feedback. Basic shell commands and troubleshooting version control issues. Best practices in clean code.

Office Manager — Sweeney's Country Style Meats

January 2017 - March 2019 // Bremerton, WA

Clerical duties and operations. Training, delegating, and assisting associates after assigning daily tasks. Receiving, invoicing, pricing, inventory and loss prevention. Supervising sanitation and safety.

Lead Mixologist — Stixx & Stones Billiards

July 2013 - August 2017 // Bremerton, WA

Food industry operations. Catering events. Designed promotions for local artists, comedians, and musicians. Building and maintaining relationships with customers, vendors, and producers. Sales of high end billiard cues and gear. Updating the menus and maintaining social media presence

Senior Product Specialist — Ashley Furniture Homestore

June 2012 - September 2014 // Silverdale, WA

Create, design, and coordinate desirable room settings. Established customer relationships and followed up after orders to assure exceptional services. Showed flexibility to achieve sales and was noted for "zero order errors" on the company POS systems.
